

MEASAT-3b LAUNCH RESCHEDULED TO SEPTEMBER

Kuala Lumpur, 05 June 2014 – MEASAT Global Berhad (“MEASAT”) announced today that the launch of the MEASAT-3b satellite had been rescheduled to September 2014. MEASAT-3b will remain in storage at the European Spaceport, Kourou, French Guiana awaiting launch.

MEASAT-3b had previously been scheduled for launch on 6 June 2014 GFT (7 June Kuala Lumpur time). The launch was postponed given the availability of the MEASAT-3b co-passenger.

MEASAT-3b is designed to provide an additional 48 high powered Ku-band transponders at the 91.5°E orbital slot to expand Direct-To-Home and VSAT services across Malaysia, India, Indonesia and Australia. Co-located with MEASAT-3 and MEASAT-3a, the satellite will more than double MEASAT’s Ku-band capacity at 91.5°E creating one of the region’s most powerful and robust orbital locations.

Updates on the MEASAT-3b launch can be found at <http://www.measat.com/3b>

###

About MEASAT

MEASAT is a premium supplier of satellite communication services to leading international broadcasters, Direct-To-Home (DTH) platforms and telecom operators. With capacity across five (5) communication satellites, the company provides satellite services to over 150 countries representing 80% of the world’s population across Asia, Middle East, Africa, Europe and Australia.

The MEASAT fleet includes the state-of-the-art MEASAT-3 and MEASAT-3a satellites at 91.5°E supporting Asia’s premium DTH and video distribution neighbourhood; MEASAT-2 at 148.0°E; and, MEASAT-5 at 119.5°E. In Africa, the AFRICASAT-1a satellite at 46.0°E provides satellite capacity across the African continent with connectivity to Europe, the Middle East and South East Asia. The MEASAT fleet will be further strengthened with the addition of MEASAT-3b in September 2014 and MEASAT-3c in H2 2015.

Leveraging facilities at the MEASAT Teleport and Broadcast Centre, and working with a select group of world-class partners, MEASAT also provides a complete range of broadcast and telecommunications solutions. Services include 3D, high definition and standard definition video playout, video turnaround, co-location, uplinking, broadband and IP termination services.
