MEASAT HOSTS OPEN DAY FOR STUDENTS

Cyberjaya, 26 March 2009 – MEASAT Satellite Systems Sdn. Bhd. (“MEASAT”) hosted its first Facility Open Day for students on Saturday, 21 March. The Open Day was organized as part of a series of activities as supporting the company’s corporate responsibility strategy focused on the development of the next generation of Malaysia’s technology leaders.

During the Open Day, the company hosted over 100 students from institutions such as Universiti Tenaga Nasional (UNITEN), Universiti Kebangsaan Malaysia (UKM), and Taylor’s University College. The students were provided with an overview of satellite communications technologies and MEASAT’s operations, illustrated through tours of MEASAT’s Satellite Operations Centre, Network Management Centre and Uplink facility Farm. During the sessions, the students were also given an overview of working for MEASAT, and opportunities for internships with the company.

“The students benefited from the informative and resourceful session,” said June Lim, Career Counsellor from Taylor’s University College. “It provided much needed guidance for those interested in this field.”

“The open day was a great success,” said Farah Suhanah, MEASAT’s General Counsel. “We look forward to organizing more of such events moving forward.”

About MEASAT

MEASAT is a premium supplier of satellite communication services to Asia’s leading broadcasters, DTH platforms and telecom operators. With commissioning of AFRICASAT-1, the MEASAT fleet is able to provide satellite capacity over 145 countries representing 80% of the world’s population across Asia Pacific, Middle East, Africa, Europe and Australia. The fleet will be further enhanced in 2009 with the launch of the MEASAT-3a satellite, providing additional capacity and in-orbit redundancy at the Company’s key 91.5E orbital video slot.

Leveraging facilities at the MEASAT Teleport and Broadcast Centre, and working with a select group of world-class partners, MEASAT also provides a complete range of broadcast and telecommunications services including high definition and standard definition video playout, video turnaround, collocation, up-linking and IP termination services.
