MAXIS RENEWS MULTI-TRANSPONDER LEASE ON MEASAT SATELLITE NETWORK

KUALA LUMPUR, 2 July 2009 – MEASAT Satellite Systems Sdn. Bhd. (“MEASAT”) announced today it had reached agreement with Maxis Communications Bhd (“Maxis”), Malaysia’s leading mobile telecommunications operator, on the renewal of a long-term multiple transponder lease for capacity on the MEASAT-3 satellite.

Maxis, which currently operates in three key Asian markets, collectively serving over 30 million customers, offers a comprehensive range of communications services, including mobile and fixed line telecommunications, value-added data and content services, wireless and fixed line broadband services and international gateway services.

“MEASAT has been working with Maxis since 1997. Our satellite capacity is used to support Maxis’ GSM services, corporate VSAT networks, IP connectivity, USP projects and news gathering services,” informed Yau Chyong Lim, MEASAT Senior Director – Sales & Marketing. “We are privileged that Maxis has renewed their contract with MEASAT for satellite capacity. We thank Maxis for their support, and we look forward to continuing a long running and mutually beneficial partnership,” Yau concluded.

About MEASAT

MEASAT is a premium supplier of satellite communication services to Asia’s leading broadcasters, DTH platforms and telecom operators. Operating three communications satellites, the MEASAT fleet is able to provide satellite capacity to over 145 countries representing 80% of the world’s population across Asia Pacific, Middle East, Africa, Europe and Australia. The fleet will be enhanced in 2009 with the launch of MEASAT-3a, providing additional capacity and in-orbit redundancy at the Company’s key 91.5°E orbital video slot.

Leveraging facilities at the MEASAT Teleport and Broadcast Centre, and working with a select group of world-class partners, MEASAT also provides a complete range of broadcast and telecommunications services including high definition and standard definition video playout, video turnaround, collocation, uplinking and IP termination services.
