

MEASAT Renews Multi-Transponder Deal with Globe Telecom

Kuala Lumpur, 9 March 2005 – MEASAT Satellite Systems Sdn. Bhd. (“MEASAT”) (formerly known as Binariang Satellite Systems Sdn. Bhd.), the owner and operator of the MEASAT satellite network, today announced that Globe Telecom (“Globe”), a major telecommunications company in the Philippines, has renewed a long term multiple transponder agreement to use the MEASAT satellite system for the distribution of GSM backbone traffic and data services.

“Supporting one of the largest telecommunications neighbourhoods in South East Asia, MEASAT ensures the technical competence and reliability of its satellite network, as well as makes a firm commitment to provide efficient and effective customer support,” said Yau Chyong Lim, MEASAT, Director of Sales. “We have had the privilege of supporting Globe Telecom since 1999, and are delighted to be able to continue working with them in this capacity.”

“We thank Globe for their support, and look forward to continuing a long and successful partnership,” Mr. Chyong Lim concludes.

About MEASAT

MEASAT is a premium supplier of satellite communication services to Asia’s leading broadcasters, telecommunications providers and DTH operators. Currently operating a two satellite network, MEASAT today serves customers in East and South East Asia, IndoChina, South Asia and Australia. The launch of MEASAT-3 in mid 2005 will extend the reach of the MEASAT fleet, providing customers with a satellite able to reach 70% of the world’s population through a single high powered C-band beam. Co-located with MEASAT-1 at 91.5°E, MEASAT-3 will be able to provide customers with network redundancy for both C and Ku-band services. With the new MEASAT Teleport and Broadcast Centre, which was opened in November 2004, MEASAT also offers a range of services to the region’s broadcasting and telecommunications companies.
