

MEASAT Signs Multi-Transponder Deal with SkyVision for Capacity on AFRICASAT-1

Kuala Lumpur, 14 February 2008 – MEASAT Satellite Systems Sdn. Bhd. (“MEASAT”) announced today that SkyVision Global Networks LLC (“SkyVision”), a leading global provider of Internet services over satellite and terrestrial fibre optic systems, has signed a multi-transponder agreement for C-Band capacity on the AFRICASAT-1 satellite.

“The commissioning of AFRICASAT-1 at 46.0°E earlier this year significantly expanded the reach of the MEASAT fleet into the African and European region” said Mr. Yau Chyong Lim, MEASAT Senior Director, Sales and Marketing. “We are pleased now to be able to announce our first contract on the satellite, supporting SkyVision’s services in this dynamic and fast growing region.”

Under the agreement, SkyVision will lease C-band transponders on the AFRICASAT-1 satellite commencing April 2008. The capacity will be used for the provision of Broadband services to SkyVision customers between Europe and Africa and across the African continent.

“SkyVision is looking forward to delivering services to its customers in Africa over the AFRICASAT-1 satellite. The combination of MEASAT quality services and SkyVision’s extensive presence in all the service segments of the African market offers to us the opportunity to provide solutions to our customers that will enable them to compete successfully in this fast-growing market.” said Mr Mody Schreiber, EVP Key Supplier Relations of SkyVision

About MEASAT

MEASAT is a premium supplier of satellite communication services to Asia’s leading broadcasters, DTH platforms and telecom operators. With the commissioning of AFRICASAT-1 at 46.0E, the MEASAT fleet is able to provide satellite capacity over 145 countries representing 80% of the world’s population across Asia Pacific, Middle East, Africa, Europe and Australia. The fleet will be further enhanced in 2008 with the launch of MEASAT-1R, providing additional capacity at the Company’s key 91.5°E orbital slot.

Leveraging facilities at the MEASAT Teleport and Broadcast Centre, and working with a select group of world-class partners, MEASAT also provides a complete range of broadcast and telecommunications services including high definition and standard definition video playout, video turnaround, collocation, uplinking and IP termination services.
