PRESS RELEASE

China Telecom Satellite and MEASAT Sign Strategic Partnership MoU

On 28 October, China Telecom hosted the "China Telecom Smart Global · AI Innovation Conference" in Bangkok, Thailand. During the conference, China Telecom Satellite Communications, MEASAT Satellite Systems (MEASAT) and Extend Networks signed a strategic Memorandum of Understanding (MoU), formally establishing a strategic partnership.

The three parties will collaborate to facilitate the deployment of Tiantong satellite services in Malaysia, leveraging the Tiantong-1 Satellite Mobile Communications System. The collaboration will explore applications across areas such as emergency communications and disaster response, connectivity for remote and underserved areas, and maritime and fisheries operations. By providing stable and reliable satellite connectivity, the partnership aims to strengthen Malaysia's digital infrastructure and enhance its disaster preparedness and response capabilities.

China Telecom Satellite Communications is China Telecom's specialist technology company focused on satellite communications and is responsible for the development and operation of the Tiantong-1 Satellite Mobile Communications System. The Tiantong-1 system provides stable and reliable mobile communications where terrestrial public networks are disrupted or cellular coverage is unavailable. Its applications include emergency and disaster response, ocean-going shipping, field research and communications for remote areas, providing all-weather, wide-area and resilient communications capabilities.

MEASAT is a leading satellite operator in Malaysia with more than 30 years of experience serving the Asia-Pacific satellite market. The company has established capabilities in satellite operations, local market channels, government and enterprise services, and disaster communications support. MEASAT has long been committed to bridging connectivity gaps in Malaysia's remote and underserved communities by providing satellite communications services to government agencies and communities.

Extend Networks is an integrated satellite network service provider that brings together multi-orbit satellite resources to deliver customised, end-to-end satellite communications solutions across industries. The company provides stable and reliable connectivity tailored to a range of operational requirements, helping customers enhance efficiency and strengthen communications resilience.

About MEASAT

Since 1996, MEASAT has been Malaysia's leading SpaceTech company, delivering satellite solutions across the Asia-Pacific region. From its prime 91.5°E orbital hotslot, MEASAT provides Direct-to-Home television services reaching more than 20 million viewers, alongside customised cellular backhaul, enterprise connectivity and high-speed broadband solutions. With its multi-orbit capabilities, MEASAT offers Starlink and SpaceSail LEO broadband connectivity, TianQi satellite IoT services, and Tiantong D2D capability in Malaysia.

Through its CONNECTme service, MEASAT has connected more than 500,000 Malaysians in remote communities, helping bridge the digital divide and expand access to essential digital services. MEASAT continues to invest in and pioneer next-generation satellite capabilities, ground infrastructure and strategic partnerships to advance Malaysia's space and digital capabilities and shape the future of connectivity across the region.
